BISTON®

CONTAINING AND
LIGHTENING THE LOAD

SUTHERLAND
HEALTH
GROUP PLC

Who we are...

Biston produces British made ergonomic products which are designed to lighten the load and address issues of load handling. The brand's two current products the Biston Point of Care Bag and the Biston Wheelchair Bag were both developed by Sue Barton and Jean Bish who are experienced chartered physiotherapists.

Biston is part of Sutherland Health Group Plc, a supplier of innovative health care brands and products to the UK National Health Service (NHS) and other UK customers.

Sutherland Health Group Plc is ISO approved and MHRA registered and has quality at the core of its business.

The Biston® Point of Care Bag

The complete equipment storage system

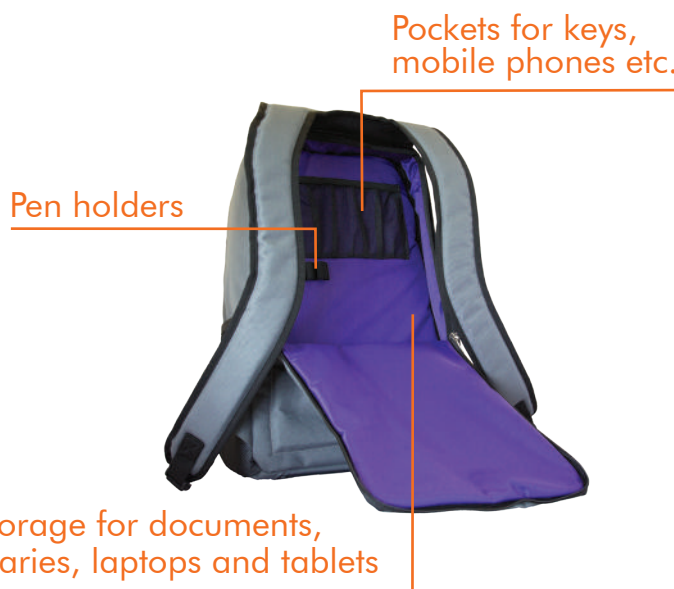

Designed for those delivering
care in the community

The Biston Point of Care Bag has been specially designed by chartered physiotherapists to effectively store a wide range of equipment, while spreading the weight evenly to provide a comfortable experience and therefore lightening the load and making it safer to carry equipment.

A large front storage section is a key feature of the Biston Point of Care Bag. This section includes adjustable dividers, which can be fastened to secure a wide range of equipment. The bag also features a detachable pouch which can be used to separately store small items including waste material and sharps.

Easy to clean material is used to line the inside of the Biston Point of Care bag and antibacterial fabric is used for the detachable examination mat which can be neatly stored in the bag when not in use. The bag has a back office section which can be used to store pens and paperwork, it is also large enough to fit laptops and electronic tablets.

Bag Dimensions:

Weight (inclusive of all inserts)	2 kgs
Height (top/bottom)	49 cm
Width (at widest point)	33 cm
Depth (overall without divider)	23.5 cm
Depth (office section)	5 cm
